

Update with Sabina Fila
January 19, 2024

Agenda

- Updates
 - End of 2023 and start of 2024 school year
 - Ellen and Prosper
- Discussion and getting to know each other better
 - Focus for the year
 - Challenges
 - What works and doesn't

EARTH Update: Graduation 2023

94 new leaders of change from **26** countries

EARTH's **31st** class, bringing our total to **2,842** graduates

Joining a movement of leaders working to **transform our food systems** and **create a more prosperous and just society.**

EARTH Update: New School Year

Welcomed **105** new students from **28** countries, including Ellen, Prosper, and their 27 Spanish program classmates

Classes started January 15 with first-year orientation starting January 8

THANK YOU for your investment in changing two lives now, and hundreds in the future as the Fidinam Scholars use their EARTH educations to benefit farmers and whole communities

Discussion: Getting to Know Each Other

- Focus for the year
 - In context of Strategic Plan 2023-27
- Challenges
- What works and what doesn't
- Q&A and discussion on EARTH and Fidiram Foundation
- Invitation to campus visit this year

Strategic Plan Context: The need for the transformation of our global food system is clearer and more urgent than ever

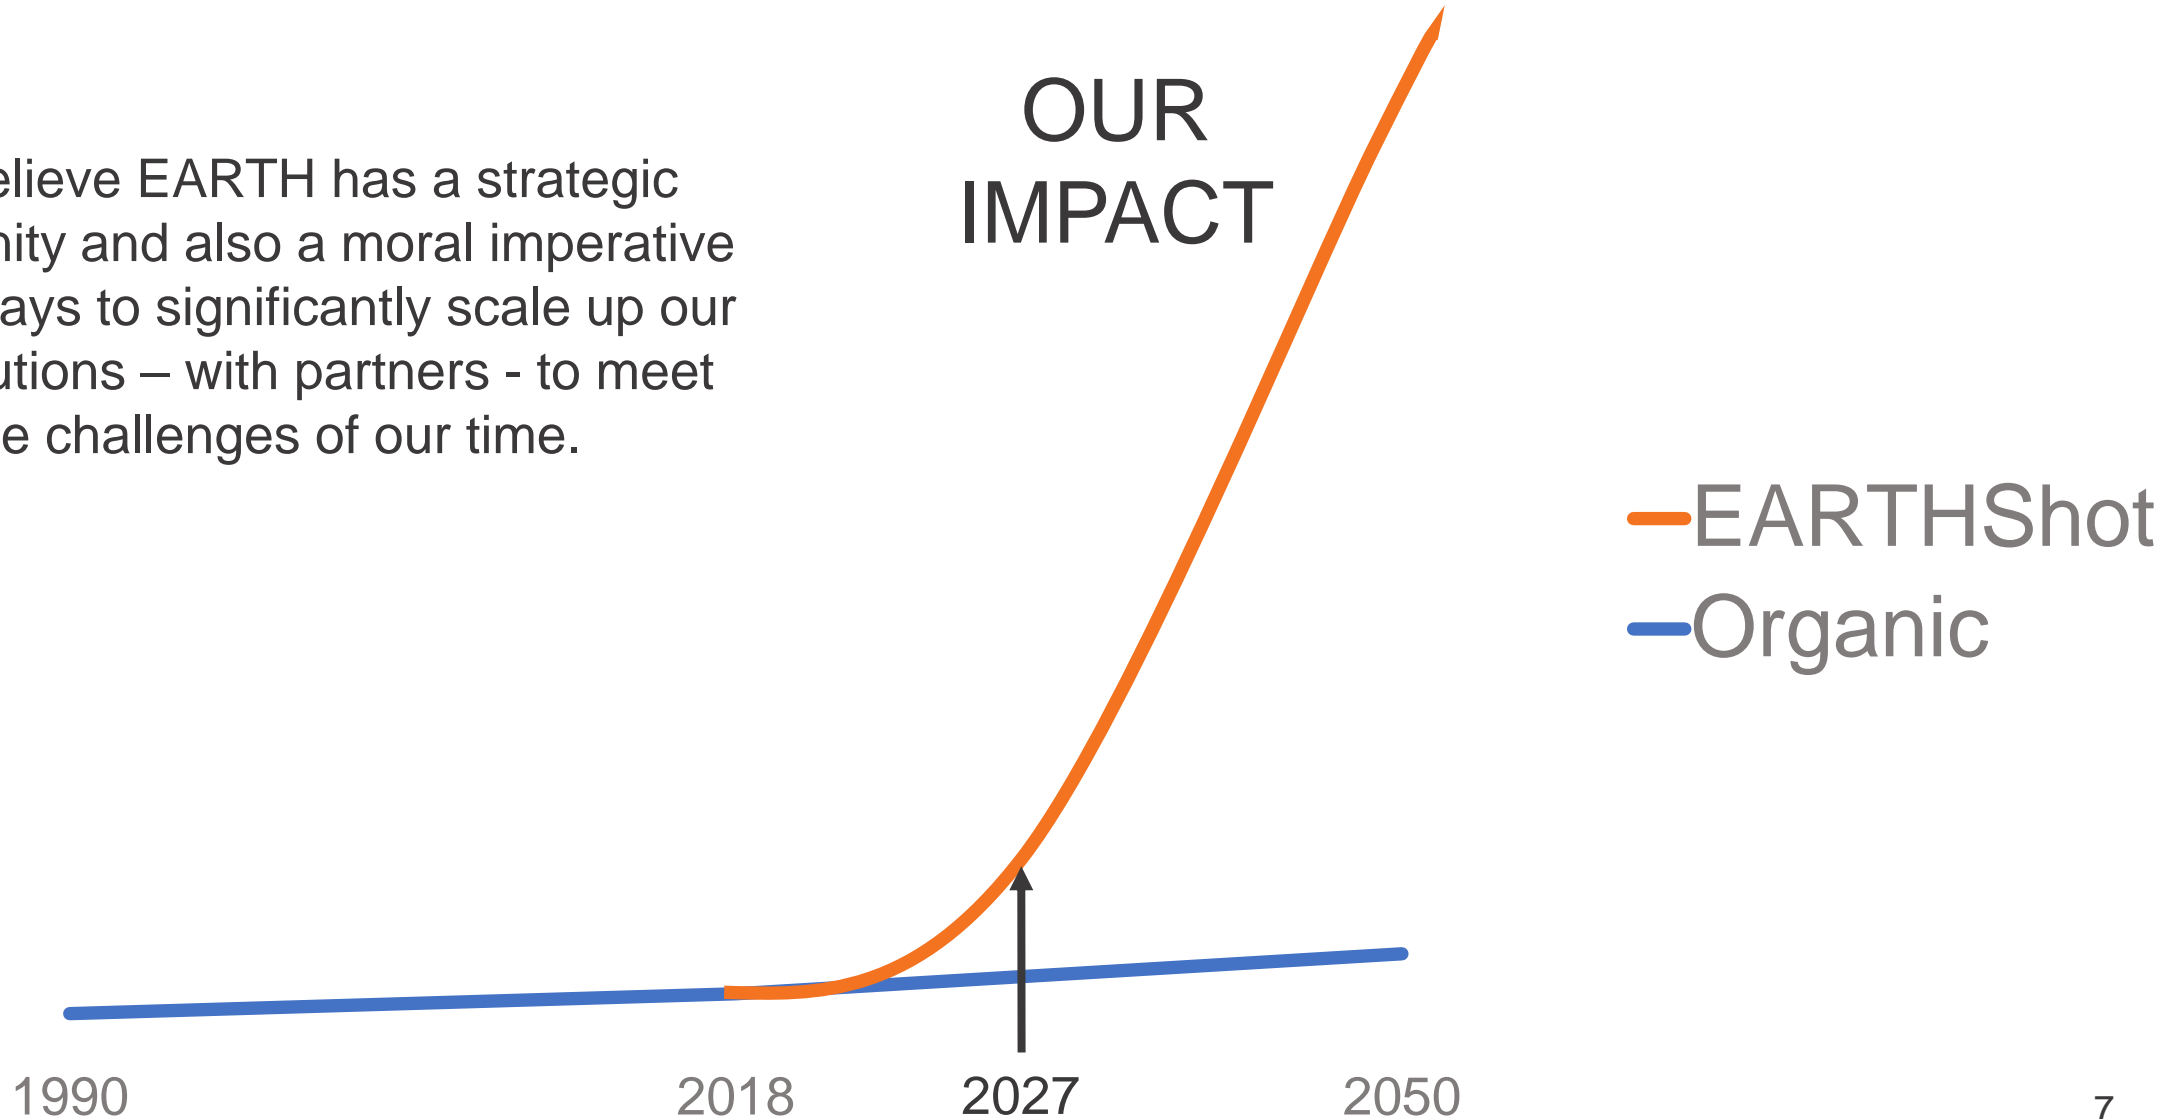

Our EARTHshot

We believe EARTH has a strategic opportunity and also a moral imperative to find ways to significantly scale up our contributions – with partners - to meet the challenges of our time.

OUR IMPACT

SP27: Define, develop and advance the core elements of the 'Exponential EARTH' model that will allow EARTH - with our partners - to empower and prepare a global movement of leaders by 2050

Our 2027 Strategic Goals:

1. Evolve and grow our **undergraduate program** to enable more young people to be more effective in building the Food Systems we need
2. Expand our portfolio of **degree and non-degree programs** to prepare significantly more leaders from across society as Food Systems change agents
3. Strengthen and support our expanded network of **EARTH alumni** to grow their leadership and impact
4. Develop and test **systemic, integrated solutions** to key Food Systems challenges and connect them with leaders who can deploy them
5. Advance models and plans to **extend the impact of the EARTH model** much more broadly in the world

Thank you for your time and support!
